

NewMet LEV250 is an extruded silicone sponge available as rectangle, cord or tube in white or redbrown colours.

The material can be supplied adhesive backed, as "O" Rings or fabricated

gaskets and cut to length. Sheets of LEV250 are also available.

Higher density grades (LEV400, LEV500) are also available.

Property	Typical Value
Profile Shapes	Rectangles, cords, tubes (Please enquire for custom profiles)
Density (kg/m ³)	390 ^{†1}
Hardness (Shore A)	15
Recommended Operating Temperature, without adhesive (°C)	-50 to +200
Shelf Life	Non-adhesive: Unlimited With adhesive: 2 years

^{†1} Density can vary based upon product dimensions. Test performed on 25mm diameter cord sample
