MultiMaster 5 - More versatility. More comfort. More safety.

Thanks to 35 mm increments on the rear section the new ZARGES MultiMaster 5 allows adjustability of up to 500 mm height difference in stairway mode and a bridging between 880 and 1200 mm in offset leaning mode. In addition, it securely leans against flat wall surfaces, internal and external corners, poles and wall studs thanks to its versatile multi-functional top. So increase your flexibility and versatility in your access! The MultiMaster 5 is loved by pros in construction, industry and maintenance!

Multi-functional deployment

thanks to top incl. impact driver holder, powertool hooks etc. and magnetic compartment that securely leans against flat wall surfaces, corners, poles and wall studs.

User friendly

through ergonomic handle for easy transportation in combination with wheels.
