

Stair nosings significantly reduce the risk of accidents while also protecting the staircase from external wear and impact in demanding environments.

# SN-100

## CORROSION-FREE FIBERGLASS STAIR NOSINGS

- ✓ Slip resistance class R13.
- ✓ Silicon carbide grit – hardness 9.3.
- ✓ UV- and chemical-resistant.

### SLIP-RESISTANT CONTRAST IN STAIRS

Maintenance-free stair nosings designed to enhance safety in staircases. The profiles are manufactured from fiberglass with silicon carbide grit, providing a highly durable and slip-resistant solution suitable for industrial, offshore, marine, and other heavy-duty environments.

The stair nosings are installed on the outer edge of the stair tread and function effectively as contrast markings—particularly important for stairs made of grating or in dark and dusty environments with limited visibility. The rear edge of the profile is chamfered to reduce the risk of tripping.

### READY-TO-INSTALL STAIR NOSING PROFILES

The profiles are available in lengths of 1,000 or 2,400 mm and can also be supplied ready for installation to exact dimensions. They are easy to install using adhesive, screws, or clips directly onto existing stairs, regardless of material or substrate. No curing time is required, allowing immediate use after installation.

### TECHNICAL INFO

<b>Product name</b>	SN-100 – Heavy Duty
<b>Art. no</b>	See <a href="http://www.safestep.fi">www.safestep.fi</a>
<b>Dimensions</b>	1 000 x 76 x 25 mm 2 400 x 76 x 25 mm
<b>Thickness</b>	4 mm
<b>Weight</b>	0.7 kg/lpm
<b>Material</b>	Fiberglass, silicon carbide
<b>Mfd. acc. to</b>	ISO 9001 & ISO 14001
<b>Installation</b>	Adhesive, screws, or clip
<b>Clips</b>	See our range
