

MULTIPLE COLOURS

The anti-slip strips are available in multiple colours and can be supplied with or without pre-drilled holes.

IDUN

ANTI-SLIP FIBERGLASS STRIPS

- ✓ Easy to install.
- ✓ No maintenance required.
- ✓ Long durability and service life.

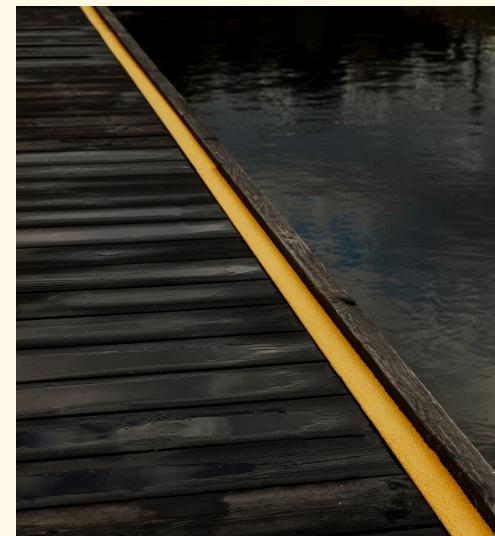

LOW-MAINTENANCE SAFETY WITH ANTI-SLIP STRIPS

A slip-resistant fiberglass strip designed to reduce the risk of slipping accidents on outdoor surfaces. Commonly used as anti-slip protection on wooden decks and boardwalks, as well as on ramps, walkways, and bridges. The profiles are manufactured from high-quality fiberglass and withstand weather, wind, chemicals, salt, and heavy loads without any maintenance requirements.

The anti-slip strips feature bevelled edges that reduce the risk of tripping, along with a grit-coated surface that provides high slip resistance while remaining comfortable to walk on—even barefoot.

READY-TO-INSTALL PROFILES

The profiles are available in lengths of 1,000 or 2,400 mm and can be supplied ready for installation to exact dimensions, with pre-drilled holes if required. They are easy to install using adhesive or screws directly onto the existing surface and can be used immediately after installation.

TECHNICAL INFO

Product name	Safestep IDUN
Article no	See www.safestep.fi
Dimensions	1000 x 50 mm 2400 x 50 mm
Thickness	2 mm
Weight	0.7 kg/lpm
Material	Fiberglass, aluminium oxide
Mfd. acc. to	ISO 9001 & ISO 14001
Installation	Adhesive or screws
