

MULTIPLE COLOURS

The anti-slip panels can be installed in all weather conditions and will neither peel nor crack.

FRIGG

ANTI-SLIP FIBERGLASS PANELS

- ✓ Easy to install.
- ✓ No maintenance required.
- ✓ Long durability and service life.

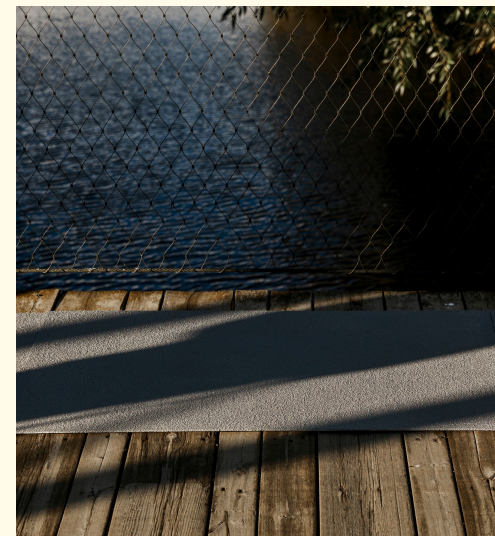

HIGH-GRIP FIBERGLASS PANELS

A flexible, anti-slip fiberglass panel with a very wide range of applications. The panels provide extremely effective slip resistance and contribute to clear visual guidance, while also protecting the underlying surface from wear and external stress. This makes them a long-term, reliable solution for environments where safety and durability are critical.

The anti-slip panels are highly wear-resistant and designed to withstand heavy loads and intensive traffic. They can be installed on virtually all types of substrates and require neither specific weather conditions nor extended downtime during installation. The products are commonly used on large surfaces such as bridges, walkways, ramps, entrances, and other exposed areas where the risk of slipping accidents is increased.

READY-TO-INSTALL PANELS

The panels are available in sizes 1,200 x 800 mm and 2,000 x 1,000 mm, but can also be supplied pre-cut to exact dimensions. They are easy to install using adhesive or screws and require no special weather conditions or ongoing maintenance. Once installed, the panels last for many years.

TECHNICAL INFO

Product name	Safestep FRIGG
Article no	See www.safestep.fi
Dimensions	1200 x 800 mm 2000 x 1000 mm
Thickness	4 mm
Weight	6 kg / m ²
Material	Fiberglass, aluminium oxide
Mfd. acc. to	ISO 9001 & ISO 14001
Installation	Adhesive or screws
