

MULTIPLE COLOURS

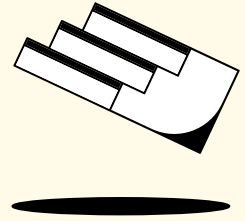

Stair nosings reduce the risk of accidents while also protecting the staircase from external wear and impact

MIMER

FIBERGLASS STAIR NOSINGS

- ✓ Easy to install.
- ✓ No maintenance required.
- ✓ Long durability and service life.

LONG-LASTING PROTECTION WITH STAIR NOSINGS

Fiberglass stair nosings are a fast, simple, and highly effective way to reduce the risk of slipping accidents in staircases. The durable, slip-resistant surface provides protection even under high loads and frequent traffic. The profiles are easy to install using screws or adhesive directly onto existing stairs, regardless of whether the substrate is concrete, steel, wood, or other common materials.

In addition to slip protection, the stair nosings also serve as contrast markings. The first and last steps can be highlighted in a contrasting colour to improve visibility and orientation—particularly important for people with visual impairments.

READY-TO-INSTALL PROFILES

The profiles are supplied in standard lengths of 1,000 or 2,400 mm, but can also be delivered ready for installation to exact dimensions, with pre-drilled holes for fast and smooth installation.

The result is a long-lasting, maintenance-free anti-slip solution that retains both its function and appearance over time, even in demanding environments.

TECHNICAL INFO

Product name	Safestep MIMER
Article no	See www.safestep.fi
Dimensions	1 000 x 70 x 30 mm 2 400 x 70 x 30 mm
Thickness	3 mm
Weight	0.9 kg/lpm
Material	Fiberglass, aluminium oxide
Mfd. acc. to	ISO 9001 & ISO 14001
Installation	Adhesive or screws
