

EAN:	4013288203946	Size:	145x77x22 mm
Part number:	05057697001	Weight:	260 g
Article number:	Bit-Check 30 Impaktor 2	Country of origin:	CZ
		Customs tariff number:	82079030

- Upright positionable, multi-component Bit-Check
- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, literally bites into the screwhead to prevent cam-out
- Impaktor holder with retaining ring and magnet for bits with 1/4" hexagon head drive

1 Impaktor holder with retaining ring and magnet, 29 Impaktor bits. The Impaktor technology offers an above-average service life even under extreme circumstances thanks to the best possible utilisation of the material properties and the optimised geometry; particularly suitable for use with customary impact drivers; holder with ring magnet for simple holding of even longer and heavier screws, ideal for overhead work. The rough diamond-coating of the bits reduces the risk of a slipping out of the screw head thanks to the enhanced frictional resistance.

At the workplace

Impaktor technology for an above-average service life even under extreme demands

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

Improved productivity

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

Above-average service life

Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

Impaktor-Bits

For an above-average service life. Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects - particularly high in power tool applications - which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

Torsion zone

Torsion zone specially designed to absorb such forces and thereby protect the bit tip.

Impaktor stainless steel holder

The Impaktor stainless steel holder with a retaining ring and magnet satisfies the extreme, dynamic requirements in that there are consciously no small mechanical component parts fitted as they would be more susceptible to failure. It focuses on the basic bit holding function and the cushioning of the extreme impulse peaks with its two different torsion zones. Mainly used in industrial screw assembly applications e.g. with screwdriving robots.

TriTorsion system

The combination of the double torsion zones in the Impaktor holder and the torsion zone in the Impaktor bit results in the so-called TriTorsion system.

Set contents:

897/4 IMP Impaktor holder with retaining ring and magnet, 1/4" x 75 mm

851/1 IMP DC Impaktor bits, PH 1 x 25 mm

855/1 IMP DC Impaktor bits, PZ 1 x 25 mm

867/1 IMP DC Impaktor TORX® bits, TX 25 x 25 mm

840/1 IMP DC Impaktor bits, 3 x 25 mm
