

<b>EAN:</b>	4013288096289	<b>Size:</b>	155x130x55 mm
<b>Part number:</b>	05059295001	<b>Weight:</b>	494 g
<b>Article number:</b>	KK 60	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	82079030

- Quick-release chuck with Rapidaptor technology
- Multi-component Kraftform handle of the bit holder for fast and ergonomic screwdriving
- Hexagonal anti-roll feature against rolling away
- Hex-Plus allows socket head screws to live longer
- Suitable for docking with the Wera 2go system.

Folding bag with 89 mm long bits. Including Kraftform 816 R bitholding screwdriver with Rapidaptor quick-release chuck and multi-component Kraftform handle for fatigue-free working. Hard handle zones for high working speeds, while soft handle zones guarantee a high torque transfer. Suitable for manual and machine operated couplings. 17-piece set.

**For fixed workplace locations  
and external sites**

Why is the right tool so often not at hand? The reason: too many tools and overly-heavy tool bags can make it bothersome to carry them onsite. So for us it was a clear challenge: to design a tool that is suitable for a whole host of applications and can be easily taken along to jobs at other sites. Our solution: Kraftform Kompakt tools. A handle into which blades with a range of different profiles can be inserted. Compactly and protectively housed in a light and robust textile pouch or plastic box.

Frequently, users have to work with their tools at a fixed workplace location as well as at external sites. Just as frequently, it is only on site that a decision is taken as to whether to work manually or with a power tool. The Kraftform Kompakt tool sets equip the user for both types of operation with just single set. Additionally, the sets are kept in belt pouches or plastic cases. This keeps them secure and clean and means that they are clearly arranged for easy tool selection, something that is very practical when they are to be used or transported.

**Handle/interchangeable blade  
system**

The handle/interchangeable blade system allows rapid exchange of the blades required for a wide range of applications.

**Chuck-all**

The Rapidaptor quick-release chucks hold 1/4" DIN ISO 1173-C 6,3 and E 6,3 as well as Wera series 1 and 4 bits.

#### Rapid-in and self-lock

The bit can be pushed into the adaptor without moving the sleeve. The lock is activated automatically as soon as the bit is applied to the screw. Bits are held securely and wobble-free.

#### Rapid-out

Simply push the sleeve forward to change the bit. The spring mechanism lifts the bit off the magnet and unlocks the tool. The bit can be easily removed. The rapid-out function makes it easy to remove even the smallest bits without extra tools.

#### Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

#### Prevents hand injuries

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.
