

EAN:	4013288018274	Size:	50x16x2 mm
Part number:	05021010001	Weight:	2 g
Article number:	950	Country of origin:	CZ
		Customs tariff number:	82041100

- L-keys for hexagonal socket screws
- Wear-resistant size marking
- Hexagonal socket wrench with Hex-Plus advantage for a longer screw life
- High corrosion protection thanks to chrome-plating
- Metric

Premium L-key for hexagonal socket screws. Hex-Plus offers larger contact surfaces in the screw head. The notch effect is reduced to a minimum and the destruction of the screw head is almost eliminated. The thoroughly chrome-plated design guarantees high corrosion protection.

L-Keys

We questioned the classic L-key design, since all too often the screw head recess is rounded out, meaning screws can no longer be tightened or loosened - and so the user finds the L-key slipping out of the recess. Wera Hex-Plus tools have a larger contact surface in the screw head. The notching effects are reduced and thereby the deformation of the screws. At the same time, as much as 20 % more torque can be applied.

Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Size identification

The size of each L-keys has been engraved by a laser. In addition Take it easy L-keys have a colour coding according to sizes - for simple and rapid accessing of the required tool. Making it easy to find the right tool.

Surface protection

Chrome-plated hexagon L-keys for outstanding surface protection and long service life. High corrosion protection.
