Declaration of Compliance

This declaration of compliance is based on an original inspection and production control carried out by factory.

Hereby we would like to confirm compliance referring to production and inspection of safety storehouses and its components in accordance with the following technical rules and standards:

1. LaCont water protection container

Assembly of safety storehouses will be made in accordance with the general technical approval Z-38.5-122.

2. Sump pallets

Production of sump pallets until 1000 liters will be made in accordance with MVV TB No. C 2.15.12 „Guideline about requirements on sump pallets made of steel with a capacity volume until 1000 liters – StawaR“ – annex 17 of MVV TB –.

Sump pallets > 1000 liters are manufactured according to the general technical approval Z-38.5-122, in connection with MVV TB No. B 4.1.1 (sump pallets). The result of internal inspections is certified with a test report 2.2 as per DIN EN 10204.

3. Steel construction components and supporting structure

Dimensions and version of steel construction components is based on MVV TB according to serial no. A 1.2.1.2 (snow and wind load) and A 1.2.4.1 (version of steel structures).

4. Primary products, semi-finished products

Proof of qualities regarding the used primary products and semi-finished products will be made by material no. 1.0038, i.e. test report 2.2 referring to other steel grades by means of an approval certificate 3.1 as per DIN EN 10204.
